

CoilBoxx™

CakeBoxx for Coils

With a specially modified deck and a various lid configuration options, CoilBoxx™ 20ft containers are the perfect option for safe, secure and cost-effective containerized coil transport.

CakeBoxx CoilBoxx containers encompass the same 'deck and lid' design, locking system, and CSC certification to ISO standard as other 20' CakeBoxx variations.

The cradles slot into grooves in the CoilBoxx deck and are easily adjusted to accommodate coil cargos of different sizes. Coils can be quickly, easily loaded/unloaded, and effectively lashed with 360° access to the cradles and CakeBoxx Perimeter Tie Down System (PTS).

Why move coils in a CakeBoxx container?

- ✓ **Improved handling** - Simple, quick loading and securement of coils using existing lashing materials and no need for blocking or bracing
- ✓ **Increased efficiency** - Reduced handling time and increased terminal velocity with seamless integration into the logistics chain
- ✓ **Safe & Secure** - Safe to operate, total protection from the weather with closed lid, and reduced or eliminated chance of impact damage
- ✓ **Containerized** - Containerizing coils allow for lower cost, more frequent shipping options than break bulk
- ✓ **Versatile** - Can be shipped without the lid like a flat rack for domestic movements, saving time and cost
- ✓ **Backhaul** - Cradles can be bundled at one end of the container, allowing for flat deck back haul cargos
